

21 Ageless Classics

The 21 shots on this list have amused and entertained audiences for decades with some going back well over a hundred years. These shots have stood the test of time and will doubtless still be played long after we're giving our exhibitions in the sky.

A fair percentage of trick shots most likely originated to give their creators a means of hustling a buck or two. So the list is heavily tilted in favor of the Hustler's Specials in Chapter 1. The Jar the Table shot and A Dab Will Do You are outright con jobs. If you are out to win a modest wager with Christopher Walken Take One you will first have to put in some practice time.

There are five shots from the Chapter 4, Crowd Pleasers, giving proof that popular shots like the Butterfly, Titanic and the Football Shot never seem to wear out their welcome.

When you play a shot from this group, perhaps you can give your audience a little history lesson on the shot. Once again, I give you full permission to exercise your artistic license.
